

1. Print the Powercat of your choice, or print them all if you like!
2. Cut around the solid gray outline.
3. Before folding, cut a slot or a small hole into the tab with an X.
4. Fold the ornament along each of the dotted lines.
5. Attach the tabs to the back side of the Powercat layout with tape or glue.
6. To make a hanger, unfold a paper clip to look like an S. Insert one end of the clip in the hole you made on Step 3.
7. Go hang that work of art on your tree and have a happy holiday!
